

Write in your SS Composition the following Study Guide questions:

1. On a map, what is the name of the symbol with four arrows pointing in different directions?
2. What is a map scale most like?
3. If a map's scale shows that one inch on the map equals ten miles in real life, how many inches on the map would stand for twenty miles?
4. What can help you find the distance between two towns on a map?
5. If you're planning a trip, you might use two different road maps. Why?
